CYBER AWARE
BAHRAIN

The National Cyber Security Center launches the fourth edition of **“Cyber Aware Bahrain”** in conjunction with Global Cybersecurity Awareness Month, reaffirming the Kingdom’s commitment to a progressive and sustainable national cybersecurity culture.

STOP. THINK. SECURE. is the campaign’s guiding message to all employees, students, parents, NGO members, and people with special needs, emphasizing that every individual plays a vital role in protecting themselves and contributing to national security.

This year marks a cyber maturity milestone, as the campaign engineers its awareness messages into two categories:

Safe Behaviours:

Shaping digital culture and safe habits

Best Practices:

Reinforcing actionable steps for protection

By applying Human Factors in Cybersecurity (HFCS), the campaign transforms these messages and best practices into practical, daily behaviours. These behaviours collectively aim to enhance national cyber resilience and reinforce Bahrain’s position as a proactive participant in global cybersecurity efforts.

Campaign Objectives

Drive cultural and behavioural change.

Establish secure digital habits and personal accountability through awareness messages designed under the Safe Behaviours and Best Practices categories, connecting awareness to practical application.

Promote best cybersecurity practices.

Reduce the impact of evolving cyber threats and reinforce the values of safeguarding national security.

Strengthen national cyber resilience.

By expanding awareness across all sectors and reinforcing shared responsibility, Bahrain can enhance its cyber maturity and preparedness on the global stage.
